

SPECTRA IN A QR-CODE

QR-code can be read with smart-phone, or app, which will open the spectra in InterSpec, or any other program that implements support.

QR-code also be used to generate a pre-populated email, with spectrum information, that can easily be sent for reachback analysis

- Foreground + Background spectra for 1024 channel detector in single QR-code.
- About half of HPGGe spectra use single QR-code – otherwise can use multiple.
- All spectral info is in QR-code – no “cloud” or internet.
- QR-code holds a text “URI” that can be used in email, links, etc.
- Simple definition that is open, and non-encumbered.
